The greatest mistake in the treatment of diseases is that there are physicians for the body and physicians for the soul, although the two cannot be separated. - Plato

The Philosophy of Natural Healing

The homeopathic philosophy recognizes the vital energy connection of body, mind, and spirit. These homeopathic courses study the psychological, energetic and physical aspects of healing in the pursuit of restoring health and vitality.

The Philosophy of Prana, Vital Energy, or Qi

Homeopathic remedies contain prana or qi, they also affect the vital energy of the body. They are pure prana remedies. When prana is suspended in a fluid medium it can be potentized through a series of dilutions and succussions. The higher the potency means the prana of the remedy has become purer and more exalted in healing energy, therefore these remedies work deeper and last a lot longer in their action.

"When a substance in its gross form produces an ailment, doesn’t it refined for produce relief of the same ailment?“

(Shrimad Bhagavata Mahapurana)
§ 1
The physician’s high and only mission is to restore the sick to health, to cure, as it is termed.

§ 2
The highest ideal of cure is rapid, gentle and permanent restoration of the health, or removal and annihilation of the disease in its whole extent, in the shortest, most reliable, and most harmless way, on easily comprehensible principles.

§ 4
He is likewise a preserver of health if he knows the things that derange health and cause disease, and how to remove them from persons in health.
"A homeopathic practitioner should be well learned in all aspects of homeopathy and be willing to explore further into the areas where Hahnemann boldly took the first steps.”  
Robin Murphy, ND
